

Facilities and Services Available to Students with Disabilities

Acron Aviation Academy has an institutional commitment to provide equal educational opportunities for qualified students with disabilities in accordance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973. To provide equality of access for students with disabilities, the institution will provide accommodations and auxiliary aids and services to the extent necessary to comply with state and federal laws. For each student, these accommodations and services will specifically address functional limitations of the disability that adversely affect equal educational opportunity.

The training programs are subject to the regulatory requirements of the FAA. Therefore, persons with certain disabilities may be limited or unable to participation and/or certification in the training programs.

Applicants or students who would like to request disability service/accommodations must make a request to the Academy Director. Students will receive written notification of the determination within seven calendar days.

Acron Aviation Academy is dedicated to assisting and providing reasonable accommodation to students with documented disabilities who request assistance. Individual student's needs are addressed by the Academic Advising team with regard to specific disabilities, academic and career goals, learning styles, and objectives for personal development.

Students interested in Acron Aviation Academy aviation programs are encouraged to contact the Enrollment Services office for information regarding eligibility concerns. All information is confidential and not included in the student's academic record.
